eLearn Upgrade and known Issues - February 2021

**eLearning Division**
Develop.Connect.Support

UPGRADE EFFECTIVE DATE: February 25, 2021   **VERSION:**   20.21.2

The information below provides key updates to eLearn from the most recent upgrade as referenced in the date above.

February Updates and Features

Accommodation	Quiz accommodation	This feature enables instructors to grant learners accommodations through the **Manage - Classlist** tool. Click on the dropdown arrow next to the student's name to **Edit Accomodation**. Accommodation options currently available include: more time to complete quizzes at the course level and the ability to bypass right-click restrictions in quizzes. The right-click restriction in quizzes is the ability for learners to right-click in the quiz while taking the quiz. Figure: The new **Edit Accommodations** dialog box Once granted, these accommodations apply to all quiz activities in a course for that learner. The additional time can be applied in terms of quiz time multipliers (for example, 1.5x quiz time) or +minutes (for example, an additional 30 minutes) on every quiz in a course. Quiz-specific special access can overwrite an accommodation for any user on a quiz-by-quiz basis.
Assignment	Rubric pop-out window for consistent evaluation	When using the new Consistent evaluation experience in Assignments, rubrics can now open to a new pop-out window when assessing assignment submissions. This change provides a larger, detailed view of rubrics in table form and encourages the use of split screens when viewing assignments. • This feature implements *PIE* item **D7232**.

Assignment	Save progress and visual enhancements	Now, the **Save** button in the new assignment creation experience enables an instructor to save their progress while creating or editing an assignment. Previously, **Save and Close** was the only option. Figure: The **Save** button in the new assignment creation experience The scrollbars on the main and right-hand panels now appear thinner and less noticeable, providing more vertical space when creating or editing an assignment. The name of the assignment appears in the immersive navbar along the top of the page. Figure: The name of the assignment on the immersive navbar and the less obtrusive scrollbar in the new assignment creation experience
Rubrics	Warning dialog for partial evaluations	Previously, if an instructor attempted to publish a partially completed rubric evaluation, the partial evaluation dialog appeared. If the instructor tapped **Enter** on their keyboard, the partial evaluation was published. Now, the default button behavior has changed so that tapping **Enter** on the page returns the user to the rubric to complete the evaluation. This change adds a verification layer to reconsider their action and ensure that instructors are not mistakenly publishing incomplete evaluations. Figure: The partial evaluation warning dialog appears the same, but has updated default behavior.

Known Issues

Date Reported	Issue	Response	Workaround

Date	Issue	Status	Workaround
02/19/2021	Quizzes>multiple-choice questions do not show Point Biserial (PB) and Discrimination Index (DI).	This issue is already been identified as a bug and is being recorded in the major case 01372895	
01/08/2021	Calendar > Not able to delete the event if associated with content	This is known issue, PRB 00780213	Delete the content item the event is associated with and then add the content item back again.
01/08/2021	Not getting notification after the export is finished	This is known issue.	None at this time
